## PROJECTS

### **Secure Electronic Document Signaturesolution**

Combining Laravel with the DocuSign eSignature API to enable smooth communication between the website and the DocuSign platform. Laravel queues were utilized to manage the asynchronous processing of document signing requests.

### **Dev-Profilesolution**

Manage employees for recruiting purpose based on their experience and skills with Laravel Nova backend and frontend which is interacting with Algolia Search Engine to search based on certain criteria.

### **Vcap Finance solution**

Importing spreadsheets using Laravel custom artisan commands and search using Algolia search engine.

### **Canvas topup solution**

Easy to topup and check account balance using APIs and handle Laravel Nova backend.

### **Ordering and Purchasing solution**

comprehensive end-to-end procurement procedures for fashion design supplies, assuring the quick and economical acquisition of superior materials. Carried out in-depth market research to find reliable suppliers and build connections with them, maximizing the sourcing plan to ensure a smooth supply of materials.
